Open Source Middleware for Grids and Parallelism: ProActive

Denis Caromel, Ph.D.

Professor

University of Nice-Sophia Antipolis, INRIA, CNRS, IUF

Abstract: ProActive is a GRID Java library (Source code under LGPL license) for parallel, distributed, and concurrent computing, also featuring mobility and security in a uniform framework. ProActive aimed at simplifying the programming of applications that are distributed on Local Area Network (LAN), on cluster of workstations, or on the GRID. Interactive and graphical GUI and tools will also be presented.

Monday, January 28, 2008

6:00 p.m.
